

2019 Native Plant Sale

Orders Due: **Monday, April 1** (Get your orders in early, some quantities are limited)

Pick Up: **Saturday, May 18 • 9 am–2 pm**

at **WILD Center**, 2285 Butte des Morts Beach Rd., Neenah, WI 54956

Directions: From Hwy 41, take Exit 136, drive east on BB (Prospect Ave) to right onto Northern Rd, then left onto Stroebe Rd. Off Stroebe Rd, turn right onto Butte des Morts Beach Rd.

Purchase nursery-propagated native plants in 4-inch pots with full green top growth, 1-year to 2-year growth. Plants are \$5.00 each or 12+ (a tray of same species) at \$4.50 each (for example: 12 butterfly weed).

1. **Complete** and mail the original form.
2. **Copy** your order for your records.
3. **Make check payable to:** Wild Ones Fox Valley (credit card orders add 3%).
4. **Mail to:** Wild Ones Native Plant Sale, PO Box 385, Appleton, WI 54912.
5. **Discounts** are available for not-for-profit organizations (pre-ordered plants only).

Contact Pat Filzen or Dick Filzen at (920) 754-4235 or via e-mail at rfilzen@twc.com or psf4fiber@gmail.com, with questions or to **help with the plant sale**. Copy this order form for friends, or download extra copies at foxvalleyarea.wildones.org.

How low do they grow?
 Compared to the roots of the non-native Kentucky bluegrass (far right), prairie plants and grasses have an extensive root system which helps absorb moisture and prevent erosion. Prairie plants can withstand prolonged periods of dry weather and so require little or no watering.

Native Trees Feed Caterpillars that Feed Birds

If you had the good fortune of hearing Dr. Doug Tallamy speak at the 2014 Toward Harmony with Nature Conference, you probably found his presentation on “The Vital New Role of the Suburban/Urban Garden” interesting, entertaining and inspiring. He talked about how useful the plants we typically see in our landscaping and in our gardens were for our native pollinators and our birds.

If you've never given that much thought, consider that lepidoptera larvae (caterpillars of butterflies and moths) are a critically important component of our own food webs as well as that of the bird food webs. The adult stage of the caterpillar—the moths and butterflies—are important pollinators for our fresh vegetables, for example.

All our pollinators are under attack from all sorts of elements these days – weather, temperatures, drought, flooding, pesticides (especially neonicotinoids), agricultural practices, disease and other insects. If we are to maintain our own well-being and continue to enjoy many of the fresh fruits and vegetables, dairy, and meat and poultry products we now do, it will be important for us to improve the habitat for the pollinators so they can continue to thrive.

Big Poplar Sphinx

Although he addressed the need to use all native plants in our landscaping, Tallamy spoke specifically about our native woody plants. Here is a portion of the amazing list of woody plants he presented as host plants for our lepidoptera larvae ranked in terms of the number of caterpillar species (in parentheses) they support:

- Oaks *Quercus* (557)
- Cherries *Prunus* (456)
- Willows *Salix* (455)
- Birches *Betula* (411)
- Poplars *Populus* (367)
- Crabapples *Malus* (308)
- Maples *Acer* (297)
- Blueberries *Vaccinium* (294)
- Alders *Alnus* (255)
- Hickories *Carya* (235)
- Elms *Ulmus* (215)
- Pines *Pinus* (201)
- Hawthorns *Crataegus* (168)
- Berries *Rubus* (163)
- Spruces *Picea* (150)
- Ashes *Fraxinus* (149)
- Linden *Tilia* (149)
- Pears *Pyrus* (138)
- Roses *Rosa* (135)
- Filberts *Corylus* (131)
- Walnuts *Juglans* (129)
- Chestnuts *Castanea* (127)
- Beeches *Fagus* (127)
- Serviceberry *Amelanchier* (124)
- Larches *Larix* (121)
- Dogwoods *Cornus* (118)
- Firs *Abies* (117)
- Bayberries *Myrica* (108)
- Viburnums *Viburnum* (104)
- Currants *Ribes* (99)
- Hophornbeam *Ostrya* (94)
- Hemlocks *Tsuga* (92)
- Spireas *Spiraea* (89)
- Grapes *Vitis* (79)
- Douglasfir *Pseudotsuga* (76)
- Locusts *Robinia* (72)
- Hornbeams *Carpinus* (68)
- Mountainashes *Sorbus* (68)
- Sweetfern *Comptonia* (64)
- Witchhazels *Hamamelis* (63)
- Sumacs *Rhus* (58)
- Rhododendrons *Rhododendron* (51)
- Arborvitaes *Thuja* (50)
- Persimmons *Diospyros* (46)
- Honey-locusts *Gleditsia* (46)
- New Jersey Tea *Ceanothus* (45)
- Sycamores *Platanus* (45)
- Huckleberry *Gaylussacia* (44)
- Hackberry *Celtis* (43)
- Junipers *Juniperus* (42)
- Elders *Sambucus* (42)
- Ninebark *Physocarpus* (41)

As you're preparing to replace the ash trees which are falling victim to the emerald ash borer or just adding trees to your landscape, please keep in mind the trees and shrubs that provide the most benefit for our pollinators and for our own well-being.

To assure yourself success, be sure to choose plants that are suitable for your soil, the amount of light in the area, and the moisture content of the earth.

Wild for Monarchs and Pollinators

Wild Ones continues in its efforts to save America's favorite butterfly through the Wild for Monarchs campaign. But this year Wild Ones is expanding its efforts to include pollinators. Our Chapter will continue to offer programs to support these efforts. We encourage everyone to buy and plant more milkweed (the host plant for the Monarch) and more nectar plants (food sources for the Monarch and other butterflies and pollinators) during our Native Plant Sale.

Create a butterfly and a pollinator garden with native plants or integrate these plants into your existing garden:

Host Plants (milkweeds native to our area)

- Butterfly Weed
- Common Milkweed*
- Swamp (Red) Milkweed

**This is not on our form, at this time. Please consider collecting these seeds this fall to help us develop local wild milkweed seed resources.*

Late Flowering Nectar Plants

- Aster, Heath
- Aster, New England
- Aster, Sky-blue
- Aster, Smooth Blue
- Aster, White Wood
- Goldenrod, Ohio
- Goldenrod, Showy
- Goldenrod, Stiff
- Ironweed
- Little Bluestem
- Palm Sedge
- Prairie Dropseed
- Sneezeweed

Mid-Season Nectar Plants

- Boneset
- Black-eyed Susan
- Black-eyed Susan, Sweet
- Blazing Star, Meadow
- Blazing Star, Prairie
- Blazing Star, Rough
- Brown-eyed Susan, Sweet
- Compass Plant
